Test Comments: *Late planting and almost too wet or too dry kept this corn from reaching top yield potential. Corn started well and looked good for most of the year, but lack of heat held this corn back. Corn plants were standing excellent at harvest with only tops going out. Overall rating of the plot is an 8 out of 10. (10=best)*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
