† See last page for Product/Brand, Technology and Type information. †† Milk/ton: calculated from NIRS data using Milk2006. **Bold** values significantly better than test average. **ns** = not significant

TEST COMMENTS: *Excellent seedling emergence this year. Early plant development was slow due to dry conditions in June. Once July came, so did the rainfall for the rest of the summer.*

Wet soil conditions this fall delayed harvest, resulting in drier than normal silage moistures. Corn plant drydown was extremely fast due to high disease pressure which included gray leaf spot, eye spot and anthracnose.
