† See last page for Product/Brand, Technology and Type information. †† Milk/ton: calculated from NIRS data using Milk2006. **Bold** values significantly better than test average. **ns** = not significant

**TEST COMMENTS:** *Wet conditions at planting but emergence was good. Dry conditions here from late June into early July. Rainfall for the remaining of the growing season was well above average. Harvest was delayed due to wet field conditions and gray leaf spot fired most all leaf tissue.*
